

ROUNDING UP THE CATTLE RUSTLERS

Another of the Cattle Thieves Con-
victed at Red Deer—One Yet
to be Tried.

Red Deer, May 28.—The special session of the supreme court now being held here was occupied all day yesterday in hearing the charge of cattle stealing preferred against Jack De-

ing proceeded against Jack Dubois, a wealthy rancher of this district. Dubois was finally convicted under sec. 392a of the criminal code for fraudulently taking up cattle without the consent of the owner.

The maximum penalty for this charge is three years, but sentence has been reserved, pending the trial of James Hall, which will take place today, on a charge of cattle stealing. Hall is the fifth and last man of 7

ing of cattle rustlers rounded up by the Mounted Police. Dubois is the alleged head of the gang and is said to have superintended all operations. Exasperated at the boldness with which the gang had carried on their

predations, the Western Stock
's Association sent a special re-
quest to the department of the At-
torney General, asking that Mr. P. J.
plan, the eminent criminal lawyer
Calgary, be retained for the prosecu-

and Mr. Nolan has secured convictions against the members of the gang who have been tried so far. Hall is the last member to be tried.

WILL NOT CHANGE RITUAL.

**Sproule and Other Grand Officers
Are Re-elected.**

Peterborough, May 28.—The Grand
Lodge of British America to-

rejected a proposal to abolish each of their secret work, such as codes and signals. A committee had been appointed to consider the revision of this department of the work, and I favored the abolition of it.

report was adopted protesting against any interference with the constitution and petitions to be presented to the Imperial parliament and be circulated.

Rain Brings a Truce.

afternoon took possession of Sudman's Island despite the protests of the Sudgate's who intend building a big amusement park there. Six police officers, accompanied the workmen to the island. The

men had been busy but a short time when the Ludgate men ordered them off, it started to rain just then and both sides declared a truce. Open hostilities may be resumed tomorrow.

Drowned in Cobalt.
 Baileybury, Ont., May 28.—Hubert
 er, son of the managing director
 the Last Chance mine, of Cobalt,

drowned at the first rapids in the Montreal river about half a mile below Latchford. In company with a companion he was paddling to Latchford and was pulling up the rapids when the canoe upset.

HOW TO KEEP CITY PREMISES CLEAN

Medical Officer Whitlaw
Outlines Clearly the Way to Dis-
pose of Various Kinds of Refuse.

(Written by Dr. T. M. Whitlaw, M. D., City Medical Officer.)

In view of misapprehension which seems to exist regarding the scavenging regulations of the city as they apply to the ordinary householder, I would ask you to publish the following explanatory statement with some suggestions, which citizens generally are requested to carefully consider and to act upon, in order that the public health may be more perfectly safeguarded by making it possible for the scavenging contractors to do their work in the most thorough manner.

Disposal of Refuse Capable of Destruction by Fire.

All vegetable matter, garbage and house waste generally, of an inflammable nature must be destroyed each day by burning in furnaces, ranges or stoves. The amount of this material produced by the average householder should be expected in carrying out this regulation. There is no reason whatever why accumulations of this class of material should occur on the premises of any well regulated household. Such accumulations afford a very bad breeding-ground for the house fly. The best method of fighting this pest, so dangerous to the health of the community, is to keep it as far as possible from the conditions which favor its development.

The careful securing of windows and doors is probably the most effective means of immediate control, but this does not prevent the multiplication of the house fly in proportion to the amount of refuse which is left in the house. It is therefore necessary to prevent accumulations of refuse exposed at our back doors. At the summer season of the house fly and now is the time to begin the fight against him.

Under exceptional circumstances it may be found difficult to completely carry out these suggestions, regarding the destruction of house waste, in which case, a covered receptacle from which flies can be excluded should be used for this purpose, which will be supplied by the city scavenger on their weekly round.

With regard to collections of dead grass, weeds, chips, paper, etc., which result from a general clean up, these may be burned in the open, provided a competent person be constantly in charge to guard against danger of fire and to see that all ashes and cinders are completely extinguished before lighting. Burning of refuse in this description even in small quantities applies only to the residential districts of the city, and not to commercial or mercantile districts in which no fire of any description must be limited except with the permission of the Fire Chief and under the direct supervision of the fire department. Refuse incapable of Destruction by Fire.

Tin cans, broken glass and pottery and other waste of a non-inflammable nature must be placed in a box or receptacle, kept exclusively for this purpose. It is of course, not to be thrown such material at the ash heap or ash can, than to deposit it in a box kept for such purposes, but this is the common practice makes the ashes unfit for the excellent use to which they are put of filling in low and wet places in the public lanes of the city.

Any householder who contravenes or disregards this regulation after being warned will be required to have such unsuitable mixtures removed at his own expense.

An ash-can must be provided by each householder which shall be used for ashes only. An excellent can at cost may be obtained on application at the Health Department. It is very important that ashes should be kept

clean and free from other refuse as the demand for clean ashes to be used as a paving material for lanes at present far exceeds the supply. Any householder who deposits or allows to be deposited, garbage, tin cans, broken glass or other like material together with his ashes renders him self liable to have them removed at his own expense.

Receipts for the reception of the various kinds of garbage must be placed wherever possible adjacent to the lane and of easy access to the scavenger. Where certain difficulties in carrying out this requirement exist, the householder should report the same to the Health Department, when special arrangements to suit the conditions will be made with the scavenging contractors.

A cheerful compliance with the requirements of the Scavenging Department as suggested above, on the part of the citizens generally will aid greatly in improving the sanitary conditions of our city. Any householder who has complied with these requirements is requested to report promptly to the Health Department, any failure on the part of the scavenger to remove material which comes under the scope of this regulation, at the general expense of the ratepayers.

STRATHCONA NEWS

LOCALS.

An adjourned meeting of the license commissioners of the city of Strathcona was held yesterday to consider the license of the Regent Hotel. There was some discussion regarding the license to a gambling case that was before the board of license commissioners, and it was then adjourned to meet again on June 1st.

The Strathcona Choral Society made their appearance in the Edmonton Opera House in a concert program of choruses, quartets, duets and solo.

The roller walk of the new Shepard house was held in a room of the recent cars.

J. Ernest Carmichael who returned recently from Queen's University, Kingston, where he will teach during the summer months.

The Northern Dredging Co.'s gold dredge is now in full operation on the city.

During the past financial year there was a total of \$14,141 for all purposes in the Strathcona Methodist church.

D. G. Boileau has returned to the city from a visit to Canada, where he says that the city is doing very well.

Miss Pearl Cunningham and Roy Cunningham, who have been attending the Peoples College at Sumnerland, B.C., visited in Strathcona the past few days last night for Vancouver.

Mr. and Mrs. G. W. Marshall are receiving the congratulatory of friends on the birth of a son on Wednesday, May 26th.

An important meeting of the local board of trade will be held Tuesday afternoon at three o'clock.

CHURCH SERVICES.
Rev. Joseph Watt of Walkerville will preach in East Presbyterian church tomorrow morning.

Rev. Mr. Greenwood, of Toronto, will preach in the Baptist church tomorrow morning and in the evening Rev. Mr. Bowen will preach at his subject, "The Law of the Sixth Commandment and the power of the resurrection life."

Owing to the illness of the pastor Rev. E. E. Gordon of Metropolitan Methodist church, Rev. E. J. Hadden will preach in the morning tomorrow and Rev. W. B. S. Jones in the evening.

The annual services will take place at St. Anthony's church conducted by the pastor Rev. O. P. McDonald. Low mass at 8, high mass at 9:30. Sunday school at 10:30. Evening prayer at 7:30. Special service will be held at 8 o'clock, including a 11 and evening service at 12:30. There will be special music by the choir.

STAINED TENDERS, marked "For Mounted Police Troops and Light Supply, Province of Alberta and Saskatchewan, and additional tenders," will be received up to noon on June 1st.

Practical forms of tender containing full information as to the articles and quantities required may be had on application at any of the Mounted Police Troops, or at the office of the undersigned.

Tender will be received unless made on such printed forms.

The lowest or any tender not necessarily accepted.

Each tender must be accompanied by a cash deposit of \$100.00 or draft for an amount equal to five per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract to complete the services, or if the tender is not accepted.

No payment will be made to negotiators inserting their advertisement, without authority having been first obtained.

SATURDAY, MAY 29, 1938.

CURRENT COMMENT.

One man at the Fort thinks that there were things then being in his in wet weather.

The Edmonton ball team has moved up to second place from the top. The Calgary bunch fifty-seventh, thus same relative position at the other end of the list.

Having made an end of the revolution the Young Turks are now making an end of the revolutionists. Reports from the province speak of the Ankara district have not begun to come in yet. They should be studied in character and generous to British.

Edmonton city council expelled the four parties and the public from a meeting on Wednesday evening when the city council assembled to discuss the mix up over the city hall building. Next morning the Alberta printed a full column report of what was said and done at the meeting. If those add men know when they are kicked down a flight of stairs they should be thankful the attempt at secret sessions.

According to Bradstreet's there were 25 million bushels of wheat in the United States on May 15th, against 25 million a year ago; 10 million in Canada, 8 million in Europe and about 40 million in the United States. A total of 102 million against 112 million. So far, therefore, as the present boom in wheat prices has any relation to the quantity of the grain available it is founded on a shortage of 10 million bushels, coupled with more or less reliable promises of unfavorable yields from the crops now growing. A ten million bushel decrease out of a total of 102 million does not seem very startling to be alarmed about. The boom is founded on more on prophecy than statistics.

The citizens will no doubt accommodate themselves willingly to the Wednesday half-holiday in the streets during the summer months by "staying in." The man behind the counter has to be no means the easiest job in the community. He is fairly early in the morning and on Saturdays and days preceding holidays he stays at it late—sometimes even till midnight. Police officers are even more deservingly by the lady clerks than by those of the sterner and stronger sex. While the counter did not feel free to order a policeman to close his place of business for half of a business day the purchasing public will no doubt do what they can to facilitate the execution of the most voluntarily adopted by a large number of the shopkeepers. And in reality the buyers hold the fate of the arrangement in their hands. If they favor it and govern themselves accordingly the half holiday for the clerks will be assured. If they do not do so it will quickly be abandoned. The people who buy the hours during which buying and selling is done.

People naturally brutally inclined even hard-hearted will show few tears over the wholesale hangings in Constantinople. From the despatches it appears the punishment is preceded by trial and conviction. Perhaps among the sufferers some may pay the penalty for their political activities rather than for any crime. But in this case the result of the political upheaval was a measure of appalling proportions. Whether it was inspired by reactionary officials as there is some reason to suppose, or whether it was made possible by the paralysis of the government's power, a measure of blame rests upon the revolutionists who overthrew the old government.

The Turkish party and reinstated the rule of unbridled tyranny. If there had been no uprising against the constitutional government of Mustafa Kemal, it is conceivable that the Ankara district could have occurred. If the progressive party in Turkey hope to make their position secure the principle in the recent revolt must be exterminated and a wholesome lesson taught those who might be disposed to follow in their path. The British Labour government in Turkey being controlled in the Young Turks, little help can be found with the Turkish government necessary to consolidate their power.

NOT A POSSIBLE ENEMY.

It has long been a British maxim that Britain's fleet should equal in strength any two fleets that might be combined against it.

There were two ways of securing this preponderance. Either Britain had to build a new battleship every year or by Britain must buy her overpowered fleet to prevent other nations building fleets by the use of gunboats, as might be necessary.

What is otherwise, British close the Pacific coast and matched her fleet against the world in a race for naval construction. She presumed no right to prevent other building ships, but she also refused to allow to destroy their small fast growing fleets. Instead, she admitted that anyone who wanted to build a warship was free to do so and announced her intention of building one as good as a triple letter.

It was a home country, whether the fleet in the long run was to be used, it was in the direction of international freedom of action, of non-interference, of peace so long as peace was possible, and of trade so long as trade would always be compatible with her own security. Britain has held in her hands the fate of the German and of every other fleet in the world, for by a sudden concentration and attack at some time or other she could have easily annihilated any one of them. Wisely or unwisely she has chosen to allow them to grow in security, and allowed them to grow in security, and allowed them to grow in security.

Wisely or unwisely she has chosen to allow them to grow in security, and allowed them to grow in security, and allowed them to grow in security.

It was a home country, whether the fleet in the long run was to be used, it was in the direction of international freedom of action, of non-interference, of peace so long as peace was possible, and of trade so long as trade would always be compatible with her own security. Britain has held in her hands the fate of the German and of every other fleet in the world, for by a sudden concentration and attack at some time or other she could have easily annihilated any one of them. Wisely or unwisely she has chosen to allow them to grow in security, and allowed them to grow in security, and allowed them to grow in security.
